

**I strongly oppose the SB 1076 Bill. While I agree that some of the proposed restrictions may be appropriate, I do not agree with the regulated clip size. If one wants to do damage, it doesn't matter whether there are 6 shots or 10.**

**I agree it is responsible to require a permit to carry a weapon off his or her property, but it is unfair to require people to register weapons that are part of a collection held privately.**

**Those that would want to do harm, do not care what the law says; adding more restrictions do not in any way equate with compliance.**

**Background checks are important but we need to enforce the laws already on the books without adding additional unenforceable restrictions.**

**As a society, we need to address mental health issues long before they reach the violence exhibited by people such as Adam Lanza.**
